

WE'VE GOT YOUR FUTURE COVERED. **RIGHT NOW.**

IC BUS. THE DIFFERENCE.

IC Bus is changing the world one bus at a time. While the average school bus uses over 1,700 gallons of fuel annually, the average hybrid school bus uses around 600. So the CE Series plug-in hybrid electric school bus has your school covered with its drive to reduce your carbon footprint.

Not only can this hybrid improve your fuel economy by up to 65%, but it also reduces greenhouse gas emissions by up to 39%. It does this with a proven, clean and nimble drivetrain using the fuel efficient MaxxForce® diesel engine combined with the electric motor and battery power of a hybrid system.

The CE Series plug-in hybrid electric school bus is everything people expect in the future of school transportation, available right now.

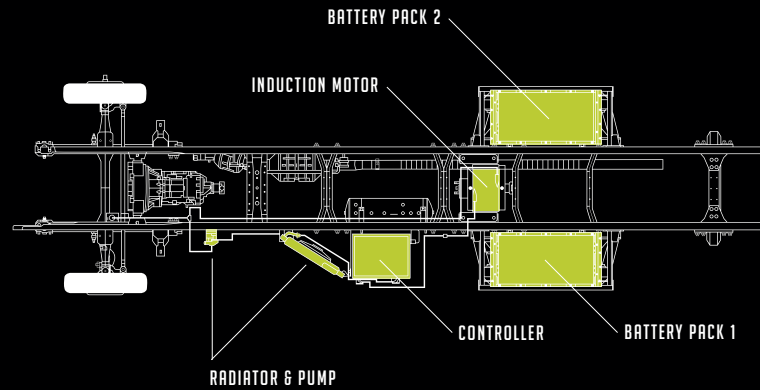

For more information about our CE Series plug-in hybrid electric school bus or to locate the nearest IC Bus™ dealer, call 1.800.892.7761 or go to ICBus.com

THE CE SERIES HYBRID SCHOOL BUS

HYBRID SYSTEM

HYBRID SYSTEM

The IC Bus™ CE Series plug-in hybrid electric school bus is built with a hybrid system featuring a 25/80kw induction motor and dual battery packs. The plug-in hybrid utilizes software calibrated to balance battery management and diesel engine power delivering fuel economy gains of up to 65%.

Through regenerative braking, battery charge is controlled to provide a steady supply of power, even after the initial plug-in charge is depleted. This allows for less wear and tear on your brakes and additional operational savings.

Maintenance is simple with the hybrid system, requiring only a coolant check per your regular maintenance schedule. We've also got you covered by backing the entire hybrid system with a 2-year/unlimited-mileage warranty.

And even though the CE Series plug-in hybrid electric school bus is state-of-the-art, with a post transmission parallel hybrid system, it maintains an engine and transmission configuration that you are already familiar with.

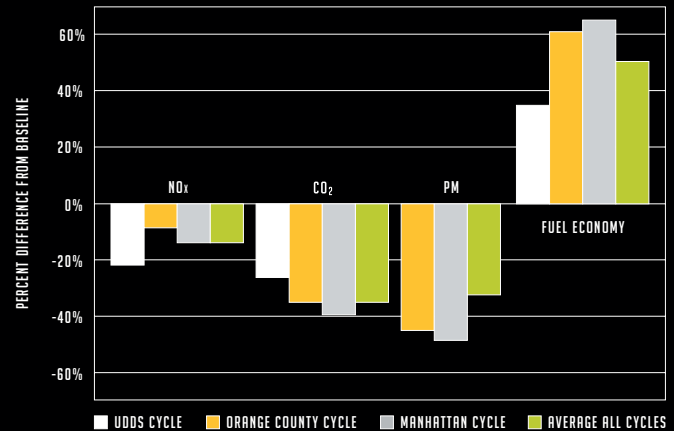

ENGINE

MaxxForce® 7
200hp/560 lb-ft
215hp/560 lb-ft
230hp/620 lb-ft

TRANSMISSION

Allison 2500
